

Will You Join Our "Get Vax Because You're Worth It" Initiative?

As of late September, according to the CDC, 51.6% of adults in Volusia County were fully vaccinated against COVID-19. We are making progress but more can be done. As an individual, you can take your booster shot by taking the brand you initially received or mix match by following your provider's guidance.

As an employer, you can encourage your employees to take their vaccine or booster shot by partnering with our medical practice and hosting a Vaccination Day. The COVID-19 virus and its variants are still impacting our community while many are still hesitant to receive a vaccine. Shekinah Health continues to provide vaccine access. We have Moderna and Johnson & Johnson vaccines, along with the regular flu shot available. **Contact us (386-206-2929) today!**

How to Participate

1. Get vaccinated to protect yourself and others. **We have both the Moderna and Janssen COVID-19 vaccines available on-site.**
2. Partner with us by hosting a **COVID-19 Vaccination Clinic**. Please **call our office at 386-206-2929** to speak with Hermeline Blanc, about how such an event can take shape.
3. If you're a business owner, post our "Because You're Worth It" Initiative informational graphics on our website in your lobby area. **These graphics are available on our website.**
4. Inform your friends, family members and employees that the Moderna and Janssen COVID-19 vaccines are available for free on-site, either by appointment or walk-in. A courtesy call is appreciated before a walk-in!
5. Share this information via your social media channels and website.

Your participation will help change the status quo and increase the percentage of residents who are vaccinated. These actions will help keep yourself, your family members and our most vulnerable population, our elders, healthy.
